Please describe a summary of work undertaken by the SAC to improve student achievement and school performance.

The work done by the SAC this year, was to support our student’s learning by providing resources to support student learning online and in the classroom. There was also a mandate to support the physical learning environment that was so heavily impacted by social distancing and mask wearing.

Please list any significant milestones and success stories that the SAC would like to highlight.

We were able to provide all grade levels resources in mathematics that would allow all students to be learning with consistent messages, and teaching strategies as they progress through the grades – this was recommended by one of the HRCE Math coaches.

We were able to provide PD training to all of our EPA’s who support our students physical and educational needs through online courses at UBC.

Please describe any related sub-committee work undertaken by SAC members (e.g., School Options Committee).
